Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- ١. Claims 1-17, 22-38,44-49, 57-69, drawn to emergency or alarm communication of the mobile device, classified in class 455, subclass 404.1.
- II. Claims 18-20, 39-42, 50-55, drawn to diagnose testing for detecting environment parameter, classified in class 600, subclass 300.
- III. Claims 21, 43, 56, drawn to remote medical analysis, classified in class 600, subclass 509.

The inventions are distinct, each from the other because of the following reasons:

Inventions I, II and III related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention an emergency or alarm communication of the mobile device and diagnose testing for detecting environment parameter has separate utility such as location monitor. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Application/Control Number: 09/990,450
